

# W cast iron motors

Frame sizes 80 to 355

# Specification and Introduction

2

## Cast Iron Specification

Specification		
	Standard product	Option
<b>Frame sizes</b>	80 - 355	
<b>Enclosure</b>	IP55	IP56, IP65, IP66
<b>Mounting option</b>	Foot (B3), Flange (B5), Face (B14) or Pad (B30)	Foot & Flange (B35), Foot & Face (B34)
<b>Terminal box position</b>	Top, (80 frame right hand side)	Right hand side, left hand side
<b>Voltage</b>	3 kW and below: 230 / 400	-
	4 kW and above: 400 / 690	-
<b>Frequency</b>	50 Hz	60 Hz
<b>Cooling</b>	IC411	IC410, IC416 & IC418
<b>Bearing location</b>	Drive end	Non drive end
<b>Lubrication</b>	80 - 180 double-shielded bearings	Regreasing facility
	200 - 355 regreasing facility	-
<b>Insulation</b>	class F	class H
<b>Temperature rise</b>	class B	class F
<b>Paint colour</b>	water blue (RAL 5021)	on request
<b>Fan cover</b>	Steel	Plastic (80 - 180)
<b>Thermal protection</b>	200 - 355 (by thermistors)	80 - 180
<b>Anti condensation heaters</b>	-	80 - 355
<b>Drain holes</b>	160 - 355	80 - 132
<b>Inverter Duty</b> (with derate)	Variable Torque: 10:1	-
	Constant Torque: 2:1	Alternative speed range
<b>Ambient temperature</b>	-20°C to + 40°C	-50°C to +100°C
<b>AC &amp; DC brake option</b>	-	80 - 355

The above specification and options give a brief summary of features available for the W cast iron range. For a full listing of optional features, please contact Brook Crompton sales.

### Brook Crompton

Brook Crompton is a leading supplier of electric motors for the global industrial market, with motor solutions which benefit a wide range of customers.

Our products are used in almost every industrial activity including water treatment, building services, chemical/petrochemicals, general processing and manufacturing where they drive fans, pumps, compressors and conveyors, amongst other things.

Brook Crompton incorporates many well known names including Brook Motors, Crompton Parkinson, Electrodrives, Newman, Bull Electric and Hawker Siddeley Electric Motors.

We have extensive stocks of motors, backed-up by a network of distributors, ensuring excellent local support wherever needed.

### Quality assurance

Stringent quality procedures are observed from first design to finished product in accordance with the ISO9001 quality systems.

All of our factories have been assessed to meet these requirements, a further assurance that only the highest standards of quality are accepted.

### W cast iron range

The Brook Crompton W motor range covers products with outputs from as little as 0.18kW to 400kW in frame sizes 80 to 355L. They are suitable for use within a diverse range of applications from food and drink to china clay production. From roller table drives to refrigeration. Many applications often have adverse operating conditions including repeated starting and occasional overloading; the 'W' range is well suited to these situations. A virtual 'go anywhere' motor, this cast iron range has a full 3-year guarantee.

### Benefits include:

- high efficiency for low running costs
- high reliability for long life
- low noise levels
- cool running for long insulation life
- Eurovoltage: 400V ±10%
- high torque with smooth acceleration and low current
- ease of maintenance
- IP55 protection
- 4-position cable entry
- multi-mount for adaptability
- also available for Zone 2, Zone 21 & 21 see catalogue 2204E for further details

### Efficiency

Brook Crompton are an approved manufacturer of ac electric motors within the UK Governments Enhanced Capital Allowance scheme. A wide range of single speed motors are included on the technology list.

Please check the ECA scheme website: [www.eca.gov.uk](http://www.eca.gov.uk) at time of purchase for current listing.

# Standards and environment

## Standards

Standards			
Motors of cast iron construction can be manufactured to the international standards listed below:			
Range	International	UK	Europe
Standard	IEC	BS, EN & IEC	EN & IEC
Outputs	IEC 60034-1	BS EN 50347:2001	EN 50347
Performance	IEC 60034-1	BS EN 50347:2001 BS EN 60034-30	EN 60034-1
Dimensions	IEC 60072-1	BS EN 50347 BS 4999 part 141	EN 50347
Mounting	IEC 60034-7	BS EN 60034-7	EN 60034-7
Degrees of protection	IEC 60034-5	BS EN 60034-5	EN 60034-5

Motors complying with IEC 60034-1 also comply with many of the national standards of other European countries, eg CEI 203 (Italy), NBN7 (Belgium), NEN 3173 (Netherlands), SEN 2601 01 (Sweden)

## Environment Enclosure

All motors have degrees of IP protection as defined in IEC EN 60034-5. The normal arrangement is IP55. See Specification (page 2) for alternatives.

## Motor cooling

Motors are cooled in accordance with IEC 60034-6. The normal arrangement is IC411 (Totally Enclosed Fan Ventilated) via a fan mounted at the non-drive end. See Specification (page 2) for alternatives.

## European directives

The following European directives apply:

### Directives

Compliance with European directives applying to AC induction motors				
Directives	Low voltage (LV)	Machinery (MD)	Electromagnetic compatibility (EMC)	Energy using products (EuP)
<b>Reference numbers</b>	73/23/EEC 93/68/EEC 2006/95/EC	89/392/EEC 93/44/EEC 98/37/EC 98/79/EC 2006/42/EC	89/336/EEC 92/31/EEC 93/68/EEC 2004/108/EC	92/42/EEC 96/57/EC 2000/55/EC 2005/32/EC
<b>Motor CE marked</b>	Yes	No	No	Yes
<b>Standards</b>	EN 60034	Not applicable	EN 60034-1	EN 60034-30
<b>Documentation for customers' technical file</b>	Declaration of conformity	Certificate of incorporation	Statement <sup>(1)</sup>	Declaration of conformity
<b>Safety instructions with every motor</b>	Yes	Yes	Yes	-
<b>Comment</b>	Relevant electrical equipment operating between 50 to 1000 volts AC	Statement <sup>(2)</sup>	Component	Minimum efficiency levels for motor outputs 0.75 - 375kW 2-6 pole

<sup>(1)</sup> Motors operating from a correctly applied, sinusoidal (AC) supply meet the requirements of the EMC directive and are within the limits specified in standard EN 60034-1

<sup>(2)</sup> When installed in accordance with our customer safety and installation and maintenance instructions, they can be put into service only when the machinery into which they are being incorporated, has been declared to be in conformity with the machinery directive in accordance with Article 4(2) and Annex IIB of that Directive (98/37/EEC)

## Minimum Energy Performance Standard

### The new standard

The EU MEPS scheme sets new **mandatory** minimum efficiency levels for most single speed 3ph induction motors up to 375kW rated up to 1000V, unlike the narrow definition of the CEMEP voluntary scheme which only covered a small number of standard motors.

The Voluntary Agreement, since 1998, of CEMEP for motor manufactures has expired (classes EFF3 /EFF2/EFF1).

The new standard for motors is now **mandatory** regulation in Europe.

The scope of EU MEPS covers 2, 4 & 6 pole single speed 3ph induction motors from 0.75 to 375kW, rated up to 1000V based on continuous duty operation.

Aiming to reduce energy consumption throughout Europe and the rest of the world, it comes into effect in 3 stages. The effect of this is to maximise potential savings in electric motor driven systems. Base of the regulation is a new international IEC 60034-30 standard. It defines the following efficiency classes :

- IE1** - Standard Efficiency (comparable to EFF2)
- IE2** - High Efficiency (comparable to EFF1 and USA EPACT 60 Hz)
- IE3** - Premium Efficiency (comparable to USA "NEMA Premium" 60 Hz)

## New Efficiency levels in Europe (Time Line)

### Mandatory from:

Since 16 June 2011:

Minimum efficiency requirement at IE2 for all motors covered 0.75 - 375kW

From 1 January 2015:

Minimum efficiency requirement at IE3 level for 7.5 - 375kW motors or IE2 level for motors equipped with an appropriate variable speed drive.

From 1 January 2017:

Minimum efficiency requirement at IE3 level for 0.75 - 375kW motors or IE2 level for motors equipped with an appropriate variable speed drive.

## Mechanical: grease, bearings & oilseals

### Bearings and greasing arrangements

Bearings are pre-packed with a grease type dependant on frame size and re-greasing facility as detailed in table opposite:

Standard and re-greasing facilities		
Type	Standard grease	Re-greasing facility
80 - 180	EA6 Polyurea	Available
200 - 355	Esso Unirex N3	Standard

Bearing references and oil seals for horizontally-mounted motors only						
Type		Bearings <sup>(1)</sup>			Oil seals <sup>(2)</sup>

All figures are based on L10aah life of 20,000 hours

# Performance data notes

## DOL starting

Typical speed/current curve

Typical speed/torque curve

- (I<sub>A</sub>) Starting current
- (I<sub>N</sub>) Full load current
- (M<sub>A</sub>) Starting torque or locked rotor torque
- (M<sub>S</sub>) Pull up torque or run up torque
- (M<sub>K</sub>) Pull out torque or breakdown torque
- (M<sub>N</sub>) Full load torque

Torque/speed curves for specific motors can be supplied on request.

## Star delta starting

Typical speed/current curve

Typical speed/torque curve

### Notes

During the run up period in Star, there must be an adequate excess of motor torque over the load torque. The change to Delta must not occur until the motor is near the operating speed.

Refer to Brook Crompton for running up against a load in excess of 70% full load during Star Delta starting.

Motors are wound for either 230/400 volts or 400 / 690 volts

Performance figures are subject to IEC tolerances. Performance figures are based on a 400 volt winding.

$$J \text{ (WK}^2 \text{ or WR}^2) = \frac{GD^2}{4}$$

$$J \text{ in lb ft}^2 = \frac{\text{kgm}^2}{0.042}$$

Where performance data indicates **IE2 or IE3** 0.75kW to 375kW 2,4 & 6 pole within this catalogue, motor testing is in accordance with IEC 60034-2-1: 2007.

# Dimensions notes

## Page notes

Shaft		
Dim D	Tol	Limits
11 to 14	j6	+0.008 -0.003
19 to 28	j6	+0.009 -0.004
38 to 48	k6	+0.018 +0.002
55 to 80	m6	+0.030 +0.011
85 to 110	m6	+0.035 +0.013

All dimensions in millimetres

Cable entry can be arranged in any one of four positions at 90° intervals

Dimensions should not be used for installation purposes unless specially endorsed

B5 mounted motors have suffix '-D' in the frame reference, eg WU-DF112MM-D and B3/B5 mounted motors have suffix '-H' in the frame reference, eg WU-DF112MM-H

B14 mounted motors have suffix 'C' in the frame reference, eg WU-DF112MM-C and B3/B14 mounted motors have suffix '-H' in the frame reference, eg WU-DF112MM-H

Dimensions should not be used for installation purposes, unless specially endorsed.

Flange		
Dim N	IEC 60072
